SURVEYING – II**Sub Code : 10 CV 44****Sub Code : 10 CV 44**
No. of Lecture Hours/Week: 04
Total No. of Lecture Hours : 52**IA Marks : 25**
Exam Hours : 03
Exam Marks : 100**PART – A****UNIT 1:****THEODOLITE SURVEY**

Theodolite and types, Fundamental axes and parts of a transit theodolite, Uses of theodolite, Temporary adjustments of a transit theodolite, Measurement of horizontal angles – Method of repetitions and reiterations, Measurements of vertical angles, Prolonging a straight line by a theodolite in adjustment and theodolite not in adjustment.

6 Hours**UNIT 2:****PERMANENT ADJUSTMENT OF DUMPY LEVEL AND TRANSIT THEODOLITE**

Interrelationship between fundamental axes for instrument to be in adjustment and step by step procedure of obtaining permanent adjustments.

7 Hours**UNIT 3:****TRIGONOMETRIC LEVELING**

Determination of elevation of objects when the base is accessible and inaccessible by single plane and double plane method, Distance and difference in elevation between two inaccessible objects by double plane method. Salient features of Total Station, Advantages of Total Station over conventional instruments, Application of Total Station.

8 Hours**UNIT 4:****TACHEOMETRY**

Basic principle, Types of tacheometric survey, Tacheometric equation for horizontal line of sight and inclined line of sight in fixed hair method, Anallactic lens in external focusing telescopes, Reducing the constants in internal focusing telescope, Moving hair method and tangential method, Subtense bar, Beamman stadia arc.
